KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Credit Risk/Default Risk. The possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner on instruments such as bonds, loans, or other forms of security which the borrower issued.

Reinvestment Risk. The risk associated with the possibility of having lower returns or earnings when maturing funds or the interest earnings of funds are reinvested.

Interest Rate Risk. This is the possibility for an investor to experience losses due to changes in interest rates.

Inflation Risk. The risk that the value of an investment is lower than the rate by which the prices of goods and services go up.

- The Fund implements a risk management policy that applies the principles of Value-at-Risk (VaR). VaR is a measure of the likely volatility of earnings due to rate fluctuations in the market. It is defined as a statistical estimate of the amount of loss that an "open" risk position is unlikely to exceed during a given time period with a given level of confidence.
- The Fund's investment outlets have been subject to proper screening and evaluation in accordance with LANDBANK –TBG's accreditation process and minimum regulatory requirements.

REDEMPTION CONDITIONS

Receipt of instruction from the Administrator; subject to penalty if redeemed before the minimum holding period.

For Partial Redemption, remaining balance should not be less than minimum investment.

FUND MANAGER'S REPORT

It is a boon to money markets that the yield curve's shape has flattened. Interest rates differential between short and long tenors have whittle down considerably with the ascent of the front end. And because of the general view that interest rates will stay higher for longer, money markets stand to benefit from this with generous high rates at the short end. This trend will likely continue until the last quarter of the year as the U.S. economy is still very strong even after the rate hikes effected by the Federal Reserve.

ABOUT THE LANDBANK PERA MONEY MARKET FUND'S BENCHMARK

1-month Bloomberg Valuation Service (BVAL) price.

Description of the Benchmark

Bloomberg's BVAL Evaluated Pricing Service provides transparent and highly defensible prices for fixed income securities across the liquidity spectrum. The key to BVAL's methodology is its real-time access to market observations from a wealth of contributed sources. This accumulated mass of market data is the main driver of an innovative and quantitative approach that first corroborates market levels on actively traded bonds and then derives a comparable relative value price for those securities that are less liquid.

This methodology aligns with Bloomberg's trusted capabilities as the financial industry's leading analytics platform and source of fixed income information. In addition to sophisticated algorithms that generate evaluated prices, the BVAL methodology assigns a BVAL Score based on the amount and consistency of market data used in our models.

Key Characteristics

The shortest benchmark tenor. Based on the one-month prevailing market rate that comprises the front end of the Philippine yield curve.

Relation to the fund's objectives/investment strategies

The fund was designed essentially for very conservative investors with frequent liquidity needs. Invested purely in deposit placements, the one-month benchmark would compare favorably with the yield of the fund.

Change in the Benchmark

The amendment to the Fund's benchmark was approved by the LANDBANK Board of Directors on 31 August 2023 through Resolution No. 23-558.

Reason for the Change of the Fund's Benchmark

The LANDBANK PERA Money Market Fund's allowable investment outlets are limited to special bank deposits, which makes it no longer comparable to the Bloomberg Philippine Sovereign Bond Index Money Market which is comprised of other fixed-income securities such as corporate bonds, government securities, and special bank deposits.

While the 1-mo BVAL is the benchmark with the shortest tenor. It is based on the 1-month prevailing market rate that comprises the front-end of the Philippine yield curve.

This makes the LANDBANK PERA Money Market fund's return more comparable to the returns of the 1-Month BVAL.
