One (1) Year Hardware Maintenance and Support for Mainframe z15 for Head Office and Disaster Recovery (DR) Site

LANDBANK is inviting interested vendors to participate in the budget discovery/exploratory study for One (1) Year Hardware Maintenance and Support for Mainframe z15 for Head Office and Disaster Recovery (DR) Site

The mainframe systems are used in the development and operation of the following high volume and mission critical IT applications. These applications are designed to run only on IBM proprietary mainframe and system software (zVSE and CICS platform) and take advantage of their faster computing capability, higher reliability and improved security features. The Bank uses Mainframe server for application systems to deliver services and for the continuous operation of the Bank's mission critical core banking systems.
