

REQUEST FOR INFORMATION

Title of the project	Additional 1317 Millions of Instructions per Second (MIPS) of Computer Associates (CA) Software Products
Date of Posting	February 17, 2025
Description	<p>Mainframe Upgrade Software Charges from 2977 to 4294 MIPS.</p> <p>The Bank has been using Computer Associates (CA) software products since 1992 when we started building and implementing major online and batch systems in our mainframe computer, specially our Deposits (CA/SA/TD) and ATM systems, in order to offer online services to our customers. The use of these products is highly integrated to all applications running on our mainframe system.</p> <p>CA software products are being used by the Bank to run, manage, operate, test and protect all of our mission-critical systems running in our highly-complex IBM mainframe infrastructure.</p>
