

REQUEST FOR INFORMATION

Title of the project	Additional Outbound Licenses (1317 MIPS) with One (1) Year Maintenance and Support Services for the Mainframe Server Upgrade from z15 Y02 to z16 702
Date of Posting	February 17, 2025
Description	<p>ASG Outbound for Linux and VSE are software used by LANDBANK's mission critical applications such as the Deposits Systems running on the mainframe and open system application such as internet banking. Outbound VSE/Linux is used as file transfer facility for the mainframe and open system environment.</p> <p>Considering the Mainframe Upgrade will increase computing capacity of our hardware computers, this will also entail new software charges, since the software charges are pegged to the size of the mainframe, this will also include the increase in capacity of the Outbound Licenses.</p>
